## **How to use Go-Bio! Multi-Surface Cleaner**

### **DIRECTIONS:**

Consult dilution chart for desired use, and then follow procedure noted below for type of cleaning job required.

- A - wipe on with cloth dampened in solution, rinse off with water, and dry
- B - as A above, except scour with steel wool before rinsing. \*Allow to soak over night for tough or heavy carbon accumulation before rinsing.
- C - Mop on surface in conventional manner, rinse with clean water and allow drying.
- D - as C above, pre spray area with solution and allow to set before removal.
- E - light soiled laundry and in high efficient washing machines use ½ oz per load, heavily soiled laundry use 1oz per load, stains on clothing pre spot full strength before washing.
- F - wash with solution and rinse thoroughly with water
